# Mozilla Things Gateway Quick Start Guide

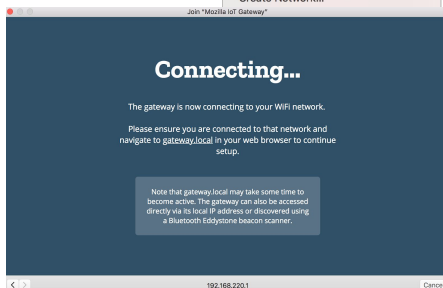

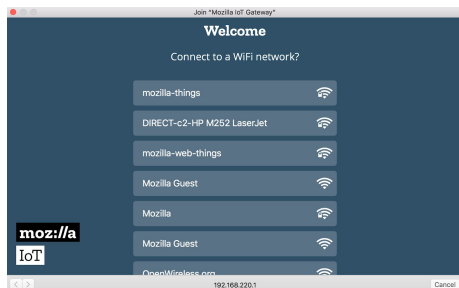

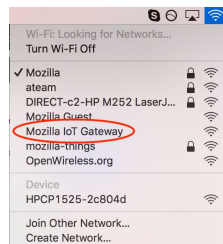

Apply Power

(1) Power **Mozilla Gateway (A)** using micro USB **power supply (B)**

(2) Wait 3 minutes

Configure Gateway Wi-Fi

Point laptop to "Mozilla IoT Gateway". A popup window will appear. Select your local Wi-Fi network from a list, type its password, wait 30 seconds.

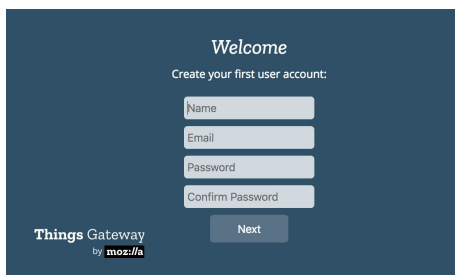

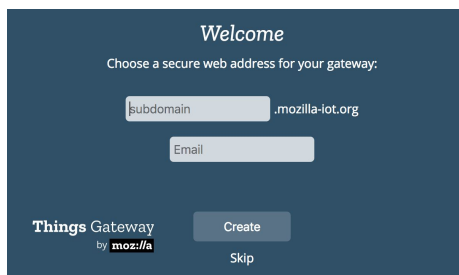

Connect to Gateway Web UI

With laptop again connected to your local network, open your browser to `http://gateway.local`

Follow Screen Prompts for Domain and User Setup

Free SSL domain automatically applied to enable secure remote access.
